

# DCDC board v3.0

Short manual (v3.0 May 2016)

For additional info check [www-pcs-electronics.com](http://www-pcs-electronics.com)

## Technical specifications:

Input voltage: 20V-48V

Output voltage: 11-16V, adjustable with a trimmer

Output current rating: 2,5A

**Note 1:** Use output on the far left to power exciters and stereo encoders, this output is filtered with extra LC filter stage.

**Note 2:** Use 15V output in the middle for fans and other non-critical loads
